settled himself down to a vigil. As he

felt hungry he took a can of cove oysters

down from the shelf and set it in the

stove. A moment afterward there was

a knock at the door, and he admitted a

cold, drenched tramp, whom he allowed

to lie down by the fire. Just then a train

came around the bend, and the station

agent stepped outside to display the go ahead signal. He felt distrustful of the

tramp and feared that he would fool

with the money drawer. As the train

passed he hurried into the room and had

scarcely opened the door and seen the

tramp standing by the stove with some-

thing glistening in his hand, when there

was a report, and the agent felt a sting-

wound, he drew his pistol and fired five

times into the room. He then dashed

round to the rear of the station and hid

under the platform. After an hour's

time he crawled out, resigned to the loss

of his money and thankful that he had

escaped with his life. The room was

dark: the fire was out. The tramp had

evidently escaped with his booty. Sor-

rowfully the agent lit a match, but

instantly dropped it when a startling

sight met his eyes. He lit another one,

There was a fierce and hustling rush for the doors, men and women fiercely fighting with each other as they crushed weaker ones beneath their feet in the effort to escape. Thus, in a very few minutes comparatively, the theater was emptied, except of the dead and injured. When the wreckage was in some degree cleared away it was found that there were 15 dead bodies, of women. The stairs and corridors were next searched for dead and wounded people who fell victims to that horrible rush for the doors which followed the explosion. A TRAPPIST REFECTORY.

Scanty Bill of Fare. We reached the Trappist refectory. A great cold room, with whitewashed walls and five long, narrow tables, with benches on each side, stretching from end to end, was the place where the monks took their very frugal meals. The tables were laid for the first meal. There were no cloths, and it is almost needless to add that there were no nap-kins, although these are considered so essential in France that even in the most wretched auberge one is usually laid be-fore the guest. Trappists, however, have little need of them.

At each place were a wooden spoon and fork, a plate, a jug of water, and another jug-a smaller one-of beer, and a porringer for soup, which is the chief diet of the Trappists. Very thin soup it is, the ingredients being water, chopped vegetables, bread and a little oil or but-

Until a few years ago no oily matter, whether vegetable or animal, was allowed in the sonp, nor was it permissible, except in case of sickness, to have more than one meal a day, but the necessity of relaxing the rule a little was realized. Now, during the six summer months of the year, there are two meals a day-namely, at 11 and 6, but in winter there is still only one that is called a meal, and this is at 4. There is, however, a gouter-just something to keep the stomach from collapsing-at 10 in the morning. No fish, nor flesh, nor animal product, except cheese and butter, is eaten by these Trappists unless they fall ill, and then they have meat or anything else that they may need to make them well. There is, however, very little sickness among them.

The living of each Trappist probably costs no more than sixpence a day to the community. Assuming that the money brought into the common fund by those who have a private fortune-the fathers, as a rule, are men of some independent means - covers the establishment expenses, and the taxation imposed by the state, there must remain a considerable profit on the work of each individual, whether he labors in the fields or in the dairy and cheeserooms, or concerns himself with the sales and the accounts, or, like the porter at the gate, tests with an instrument the richness of the milk that is brought in by the peasants, lest they who have been befriended by the monks in sickness and penury should steal from
